Appendix B: Certificate of Completion.....10

Appendix C: Member Checklist.....11

Appendix D: Net Metering Interconnection Agreement.....12

I. Purpose

The purpose of Policy 320 is to establish rules for determining the terms and conditions governing the Interconnection of electric generating facilities fueled by renewable energy with a nameplate generating capacity of not more than 100 kW to the Electric System of Lakeview Light & Power (LLP).

II. Policy

- A. These rules are intended to be consistent with the requirements of chapter 80.60 RCW, Net Metering of Electricity, and to comply with applicable sections of the Energy Policy Act of 2005.
- B. It shall be the policy of the Lakeview Light & Power (LLP) to interconnect electric generating facilities that use water, wind, solar energy, or biogas from animal waste with a nameplate generating capacity of not more than 100 kW pursuant to the terms and conditions set forth in this policy.
- C. The member shall complete LLP's *Interconnection Requirements of Member Owned Renewable Electric Generating Facilities of 100 kW* contractual agreement and adhere to all standards and guidelines published within. Failure to comply with any portion of this agreement is cause for termination of net metering at the member's expense.
- D. LLP will apply standard service fees to recover costs associated with system evaluation, meter connection, and setup.
 - 1. The new meter setup shall be a one-time fee of \$250.00 for single-phase meters and \$500.00 for three-phase meters.
 - 2. Net generation rate classes and monthly base fees shall be as follows:
 - a. Rate Class 601-Residential \$30 base fee
 - b. Rate Class 681-General Commercial \$45 base fee
 - c. Rate Class 682-Small Commercial \$60 base fee
 - d. Rate Class 683-Medium Commercial \$90 base fee
 - e. Rate Class 690-Large Commercial \$390 base fee
- E. The member's net generation shall be reported, and applied towards usage, on each monthly bill.
- F. Any residual net generation on the member's account shall be used on or before the December billing cycle. Any unused net generation will not roll to the next year, but will be zeroed out at year-end, prior to the January billing cycle.
- G. LLP meter staff shall inspect the member's net generation facilities every two years.

III. Technical Standards for Interconnection

The technical standards listed in this section shall apply to all generating facilities to be interconnected to Lakeview Light & Power (LLP) under these requirements.

- A. General Interconnection requirements

1. Any Generating Facility desiring to interconnect with LLP's Electric System or modify an existing Interconnection must meet all minimum technical specifications applicable, in their most current approved version, as set forth in this policy.
2. The specifications and requirements in this section are intended to mitigate possible adverse impacts caused by the Generating Facility on LLP equipment and personnel and on other members of LLP. They are not intended to address protection of the Generating Facility itself, Generating Facility personnel, or its internal load. It is the responsibility of the Generating Facility to comply with the requirements of all appropriate standards, codes, statutes and authorities to protect its own facilities, personnel, and loads.
3. The specifications and requirements in this section shall generally apply to the Generating Facility throughout the period encompassing the Generator's installation, testing and commissioning, operation, maintenance, decommissioning and removal of said equipment. LLP may verify compliance at any time, with reasonable notice.
4. The Generator shall comply with the requirements in subsections 4(a), 4(b) and 4(c) and all LLP policies.
 - a. Code and Standards. Applicant shall conform to all applicable codes and standards for safe and reliable operation. Among these are the National Electric Code (NEC), National Electric Safety Code (NESC), the Institute of Electrical and Electronics Engineers (IEEE), American National Standards Institute (ANSI), and Underwriters Laboratories (UL) standards, and local, state and federal building codes. The Generator shall be responsible to obtain all applicable permit(s) for the equipment installations on its property.
 - b. Safety. All safety and operating procedures for joint use equipment shall be in compliance with the Occupational Safety and Health Administration (OSHA) Standard 29, CFR 1910.269, the NEC, Washington Administrative Code (WAC) rules, the Washington Industrial Safety and Health Administration (WISHA) Standard, and equipment manufacturer's safety and operating manuals.
 - c. Power Quality. Installations will follow all applicable standards including IEEE Standard 519-1992 Harmonic Limits.
5. Primary-metered facilities may be eligible for net metering but require LLP engineering plan inspection and approval prior to application process. Master-metered facilities are not eligible to participate in net metering.

B. Specific Interconnection requirements.

1. Applicant shall furnish and install on Applicant's side of the meter, a UL-approved safety disconnect switch which shall be capable of fully disconnecting the Applicant's Generating Facility from LLP's Electric System. The disconnect switch shall be accessible on the exterior of the building and shall be of the visible break type in a metal enclosure which can be secured by a padlock. The disconnect switch shall always be accessible to LLP personnel.
2. LLP shall have the right to disconnect the Generating Facility at the disconnect switch under the following circumstances: when necessary to maintain safe electrical operating conditions; if the Generating Facility does not meet required standards; if the Generating Facility at any time adversely affects or endangers any person, the property of any person, LLP's operation of its Electric System or the quality of LLP's service to other Members; or failure of the owner of record, as filed with LLP, to notify LLP of a sale or transfer of the Generator, Interconnecting

Facilities or the premises on which the Generator is located.

3. Nominal voltage and phase configuration of Applicant's Generating Facility must be compatible to the LLP system at the Point of Common Coupling.
 4. Applicant must provide evidence that in the event of an LLP outage its generation will never result in reverse current flow into LLP's network. All instances of Interconnection to secondary spot Network Distribution System shall require review and written pre-approval by LLP. Interconnection to distribution secondary grid networks is not allowed. Closed transition transfer switches are not allowed in secondary Network Distribution Systems.
 5. LLP may impose additional requirements for the Applicant and/or Generator, including limitation on the number of Customer Generators and total capacity of Net Metering Systems that may be interconnected to any distribution feeder line, circuit, or network that LLP determines are necessary to protect public safety and system reliability.
- C. Specifications applicable to all inverter-based Interconnections. Any inverter-based Generating Facility desiring to interconnect with LLP's Electric System or modify an existing Interconnection must meet the technical specifications, in their most current approved version, as set forth below.
1. IEEE Standard 1547-2018, Standard for Interconnecting Distributed Resources with Electric Power Systems.
 2. UL Standard 1741, Inverters, Converters, and Controllers for Use in Independent Power Systems. Equipment must be UL listed.
 3. IEEE Standard 929-2000, IEEE Recommended Practice for Utility Interface of Photovoltaic (PV) Systems.
- D. Requirements applicable to all non-inverter-based Interconnections. Non-inverter-based Interconnection requests may require more detailed review, testing, and approval by LLP, at Applicant cost, of the equipment proposed to be installed to ensure compliance with applicable technical specifications, in their most current approved version, including:
1. IEEE Standard 1547-2018, Standard for Interconnecting Distributed Resources with Electric Power Systems.
 2. ANSI Standard C37.90, IEEE Standard for Relays and Relay Systems Associated with Electric Power Apparatus.
 3. Applicants proposing such Interconnection may also be required to submit a power factor mitigation plan for LLP review and approval.

IV. Application for Interconnection

- A. When an Applicant requests Interconnection from LLP, the Applicant shall be responsible for conforming to the applicable LLP policies. LLP will designate a point of contact and provide a telephone number or E-mail address for this purpose. The Applicant seeking to interconnect a Generating Facility under these rules must fill out and submit a signed Application form. Information must be accurate, complete, and approved by LLP prior to installing the Generating Facility.
- B. LLP will apply standard service fees to recover costs associated with system evaluation, meter connection, and setup.

1. The new meter setup shall be a one-time fee of \$250.00 for single-phase meters and \$500.00 for three-phase meters.
 2. Net Generation Rate Classes and Monthly Base Fees
 - a. Rate Class 601-Residential \$30 base fee
 - b. Rate Class 681-General Commercial \$45 base fee
 - c. Rate Class 682-Small Commercial \$60 base fee
 - d. Rate Class 683-Medium Commercial \$90 base fee
 - e. Rate Class 690-Large Commercial \$390 base fee
- C. Application Prioritization. All generation Interconnection application for service requests pursuant to this policy will be prioritized by LLP in the same manner as any new load application for service request. Preferential treatment will not be given to one type of request to the detriment of the other. LLP will process the Application and provide Interconnection in a time frame consistent with the average of other service connections. Generation Interconnection requests that are above 100kW may be subject to other LLP policies.
- D. Application evaluation. All generation Interconnection requests pursuant to this policy will be reviewed by LLP for compliance with these rules. If LLP, in its sole discretion, finds that the Application does not comply with this policy, LLP may reject the Application. If LLP rejects the Application, it shall provide the Applicant with written notification stating its reasons for rejecting the Application.

V. General terms and conditions of Interconnection The general terms and conditions listed in this section shall apply to all generating facilities interconnecting to LLP.

- A. Any electrical Generating Facility with a maximum electrical generating capacity of 100 kW or less must comply with these rules to be eligible to interconnect and operate in parallel with LLP's Electric System. The rules under this policy shall apply to all interconnecting Generating Facilities that are intended to operate in parallel with LLP's Electric System irrespective of whether the Applicant intends to generate energy to serve all or a part of the Applicant's load. This policy does not address commercial generation.
- B. In order to ensure system safety and reliability of interconnected operations, all interconnected generating facilities shall be constructed and operated by Generator in accordance with this policy and all other applicable federal, state, and local laws and regulations.
- C. Prior to Initial Operation, all Generators must submit a completed Certificate of Completion to LLP; execute the appropriate Interconnection Agreement contained in Attachment C, and any other agreement(s) required by these rules for the disposition of the Generating Facility's electric power output. The Interconnection Agreement between LLP and Generator outlines the Interconnection standards, cost allocation and billing agreements, and on-going maintenance and operation requirements.
- D. Applicant or Generator shall promptly furnish LLP with copies of such plans, specifications, records, and other information relating to the Generating Facility or the ownership, operation, use, or maintenance of the Generating Facility, as may be reasonably requested by LLP from time to time.
- E. For the purposes of public and working personnel safety, any non-approved generation Interconnections discovered will be immediately disconnected from LLP system.
- F. To ensure reliable service to all LLP Members and to minimize possible problems for other

Members, LLP will review the need for a dedicated-to-single-Member distribution transformer. Interconnecting generating facilities under 100 kW may require a separate transformer. If LLP requires a dedicated distribution transformer, the Applicant or Generator shall pay for all costs of the new transformer and related facilities.

- G. Net Metering for Renewable Energy as set forth in RCW 80.60: LLP shall install, own and maintain a kilowatt-hour meter, or meters as the installation may determine, capable of registering the bi-directional flow of electricity at the Point of Common Coupling at a level of accuracy that meets all applicable standards, regulations and statutes. The meter(s) may measure such parameters as LLP shall specify. The Applicant shall provide space for metering equipment. It will be the Applicant's responsibility to provide the current transformer enclosure (if required), meter socket(s) and junction box after the Applicant has submitted drawings and equipment specifications for LLP approval.
- H. Common labeling furnished or approved by LLP and in accordance with NEC requirements must be posted on meter base, disconnects, and transformers informing working personnel that generation is operating at or is located on the premises.
- I. As currently set forth for qualifying generation under RCW 80.60, for Renewable Energy resources, LLP shall not be liable directly or indirectly for permitting or continuing to allow an attachment of a net metering system, or for the acts or omissions of the customer-generator that cause loss or injury, including death, to any third party.
- J. Prior to any future modification or expansion of the Generating Facility, the Generator will obtain LLP review and approval. LLP reserves the right to require the Generator, at the Generator's expense, to provide corrections or additions to existing electrical devices in the event of modification of government or industry regulations and standards.
- K. For the overall safety and protection of the LLP system, RCW 80.60 currently limits Interconnection of generation for Net Metering to 4.00% of LLP's peak demand during 1996.
- L. It is the responsibility of the Generator to protect its facilities, loads and equipment and comply with the requirements of all appropriate standards, codes, statutes and authorities.
- M. Charges by LLP to the Applicant or Generator in addition to the Application fee, if any, will be cost-based and applied as defined by LLP. Such costs may include, but are not limited to, transformers, production meters, and LLP testing, qualification, and approval of non-UL 1741 listed equipment. The Generator shall be responsible for any costs associated with any future upgrade or modification to its interconnected system required by modifications in LLP's Electric System.
- N. Generator may disconnect the Generating Facility at any time, provided that the Generator provides reasonable notice to LLP.
- O. Generator shall notify LLP prior to the sale or transfer of the Generating Facility, the Interconnection Facilities or the premises upon which the facilities are located. The Applicant or Generator shall not assign its rights or obligations under any agreement entered pursuant to these rules without the prior written consent of LLP, which consent shall not be unreasonably withheld.

VI. Certificate of Completion All generating facilities must obtain an electrical permit and pass electrical inspection before they can be connected or Operated in Parallel with LLP's Electric System. Generator shall provide written certification to LLP that the Generating Facility has been installed and inspected in compliance with the local building and/or electrical codes.

VII. Required filings – Exceptions

A. LLP shall maintain on file for inspection at its place of business, the charges, terms and conditions for Interconnections pursuant to these rules. Such filing includes forms of the following documents and contracts:

- | | |
|------------------------------|--------------|
| 1. Application | (Appendix A) |
| 2. Certificate of Completion | (Appendix B) |
| 3. Member Checklist | (Appendix C) |
| 4. Interconnection Agreement | (Appendix D) |

APPENDIX A

Application for Net Metered Electrical Generation (no larger than 100kW)

Primary-metered facilities may be eligible for net metering but require LLP engineering plan inspection and approval prior to application process.

Master-metered facilities are not eligible to participate in net metering.

This Application is considered complete when it provides all applicable and correct information required below. Additional information to evaluate the Application may be required.

Interconnection Member Information

Applicant/Member: _____

Contact Person: _____

Address: _____

City: _____ State: _____ Zip Code: _____

Location of the Generating Facility (if different from above):

Address: _____

City: _____ State: _____ Zip Code: _____

APPENDIX C

Member Checklist for Lakeview Light & Power Interconnection

- Submit an Application to LLP
 - Interconnection inverter must be UL 1741 Listed
 - Electrical schematic drawing must be included
 - Include provisions for a lockable visible disconnect.
- Send to: Lakeview Light & Power, 11509 Bridgeport Way SW, Lakewood, WA 98499
- Receive written design approval from LLP & contact Engineering (253-584-6060)
- Get an electrical permit from Washington State L&I and construction permit from the City of Lakewood.
- Complete the installation.
Get inspections from a state electrical inspector and LLP (call LLP for inspection at 253-584-6060).
- If net metered, LLP approves, or installs new, bi-directional meter.
- If production metered, LLP installs a production meter after inspection approval.
- Submit Certificate of Completion to LLP
- Start generating power

APPENDIX D

**Net Energy Metering Interconnection Agreement
Interconnection of Member Owned Water, Wind, Solar Energy, or Biogas from Animal Waste
Electric Generating Facilities of 100 KW or Less**

This Net Energy Metering Interconnection Agreement is executed in duplicate this ____ day of _____, 20__ between _____ (hereinafter referred to as "Member"), and (Lakeview Light & Power hereinafter referred to as "LLP"). Both parties, who may be herein further referred to collectively as "Parties" and individually as "Party", agree as follows:

1. MEMBER ELECTRIC GENERATING FACILITY

- A. Member has elected, in accordance with RCW 80.60 et seq., to operate a Net Metered Renewable Energy Resource Generating Facility, with a generating capacity of not more than 100 kW, in parallel with LLP's transmission and distribution facilities. The Member's electric Generating Facility is intended to offset either part or all the Member's electrical requirements.
- B. LLP will not provide wheeling for Member as generation from the Net Metering electrical Generating Facility will only be applied to consumption at the location of said electrical Generating Facility.
- C. Member's Application for Net Metered Electrical Generation, including the location of the electrical generating installation facility and details on the electrical generating unit(s) is hereby incorporated into this agreement as Attachment A.
- D. The installation is identified by LLP with the following designators: Map Location No. _____.
- E. A separate interconnection agreement shall be entered into for each Member's electrical service location(s).
- F. The electrical generating system facility used by the Member shall be located on the Member's premises. It shall include all equipment necessary to meet applicable safety, power quality, and Interconnection requirements established by the National Electrical Code, National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, National Electrical Safety Code, the Institute of electrical and Electronics Engineers, Underwriters Laboratories, and LLP's Net Metering Interconnection Standards, as set forth in Attachment B, which is attached hereto.
- G. LLP shall have the sole authority to determine which Interconnection requirements set forth herein are applicable to Member's proposed Generating Facility.

2. PAYMENT FOR NET ENERGY

- A. LLP shall measure the net electricity produced or consumed by the Member during each billing period, in accordance with normal metering practices.
- B. If the electricity supplied by LLP exceeds the electricity generated by the Member including

any accumulated credits, then the Member shall be billed for the net electricity supplied by LLP together with the appropriate Member charge paid by other Members of LLP in the same rate class.

- C. If the electricity generated by the Member and distributed back to LLP during the billing period, exceeds the electricity supplied by LLP, then the Member shall be:
 - i. billed for the appropriate Member service charge as other Members of LLP in the same rate class; and
 - ii. credited for the net excess kilowatt-hours generated during the billing period, with this kilowatt-hour credit appearing on Member's bill.
- D. Beginning January 1st of each year, any remaining unused kilowatt-hour credit accumulated by the Member during the previous 12 months shall be granted to LLP, without any compensation to the Member.
- E. Member shall pay any amount owing for electric service provided by LLP in accordance with applicable rates and policies. Nothing in this Section 2 shall limit LLP's rights under applicable Rate Schedules, Member Service Policies, and General Provisions.

3. INTERRUPTION OR REDUCTION OF DELIVERIES

- A. LLP may require Member to interrupt or reduce deliveries as follows:
 - i. when necessary in order to construct, install, maintain, repair, replace, remove, investigate, or inspect any of its equipment or part of its system; or
 - ii. if LLP determines that curtailment, interruption, or reduction is necessary because of emergencies, force or compliance with prudent electrical practices.
- B. Whenever possible, LLP shall give Member reasonable notice of the possibility that interruption or reduction of deliveries may be required.
- C. Notwithstanding any other provision of this Agreement, if at any time LLP determines that either:
 - i. the Generating Facility may endanger LLP personnel, or
 - ii. The continued operation of Member's Generating Facility may endanger the integrity of LLP's Electric System, and then LLP shall have the right to disconnect Member's Generating Facility from LLP's Electric System. Member's Generating Facility shall remain disconnected until such time as LLP is satisfied that the condition(s) referenced in (a) or (b) of this section 3 have been corrected.

4. INTERCONNECTION

- A. Member shall deliver the excess energy to LLP at LLP's meter
- B. Member shall pay for designing, installing, inspecting, operating, and maintaining the electric Generating Facility in accordance with all applicable laws and regulations and shall comply with LLP's Interconnection Standards set forth in Attachment B, which is attached hereto.
- C. Member shall pay for LLP's standard watt-hour meter electrical hook-up, if not already present.
- D. Member shall not commence Parallel Operation of the Generating Facility until written

approval of the Interconnection Facilities has been given by LLP. Such approval shall not be unreasonably withheld. LLP shall have the right to have representatives present at the initial testing of Member's protective apparatus. Member shall notify LLP when testing is to take place.

5. MAINTENANCE AND PERMITS

Member shall:

- A. maintain the electric Generating Facility and Interconnection Facilities in a safe and prudent manner and in conformance with all applicable laws and regulations including, but not limited to, LLP's Interconnection Standards, and
- B. obtain any governmental authorizations and permits required for the construction and operation of the electric Generating Facility and Interconnection Facilities, including electrical permit(s).
- C. reimburse LLP for any and all losses, damages, claims, penalties, or liability it incurs as a result of Member's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of Member's Generating Facility or failure to maintain Member's Generating Facility as required in (a) of this Section 5.

6. ACCESS TO PREMISES

LLP may enter Member's premises or property at any time to:

- A. inspect, without prior notice Member's Generating Facility's protective devices;
- B. read and test meter(s); and
- C. disconnect at LLP's meter or transformer, without notice, the generating facilities if, in LLP's opinion, a hazardous condition exists and such immediate action is necessary to protect persons, or LLP's facilities, or property of others from damage or interference caused by Member's electric generating facilities, or lack of properly operating protective devices or inability to inspect the same.

LLP inspection or other action shall not constitute approval by LLP. The Member remains solely responsible for the safe and adequate operation of its facilities.

7. INDEMNITY AND LIABILITY

- A. The Member assumes the risk of all damages, loss, cost and expense and agrees to indemnify LLP, its successors and assigns, and its respective directors, officers, employees and agents, from and against any and all claims, losses, costs, liabilities, damages and expenses including, but not limited to, reasonable attorney fees, resulting from or in connection with performance of the agreement or which may occur or be sustained by LLP on account of any claim or action brought against LLP for any reason including but not limited to the loss of the electrical system of the Member caused by or arising out of an electrical disturbance.
- B. Such indemnity, protection, and hold harmless includes any demand, claim, suit or judgment for damages, death or bodily injury to all persons, including officers, employees or agents, and subcontractors of either Party hereto including payment made under or in connection with any Worker's Compensation Law or under any plan for employees' disability and death benefits or property loss which may be caused or contributed to by the Interconnection, maintenance, operation, use, presence, or removal of Member's equipment. The only exception will be liability occasioned by the sole negligence or willful misconduct of LLP or its employees acting within the scope of their employment and liability occasioned by a partial negligence of LLP or

its employees acting within the scope of their employment to the extent that such partial liability is fixed by a court of competent jurisdiction.

- C. The provisions of the Section 7 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any insurance policy.
- D. LLP shall have no liability, ownership interest, control or responsibility for the Member's Electric Generating Facility or its Interconnection with LLP's Electric System, regardless of what LLP knows or should know about the Member's Electric Generating Facility or its Interconnection
- E. Member recognizes that it is waiving immunity under Washington Industrial Insurance law, Title 51 RCW. This indemnification shall extend to and include attorney's fees and the costs of establishing the right of indemnification hereunder in favor of LLP.

8. INDEPENDENT CONTRACTORS

The Parties hereto are independent contractors and shall not be deemed to be partners, joint ventures, employees, franchisees or franchisers, servants or agents of each other for any purpose whatsoever under or in connection with this Agreement

9. GOVERNING LAW

This Agreement shall be interpreted, governed, and constructed under the laws of the State of Washington as if executed and to be performed wholly within the State of Washington. Venue of any action arising hereunder or related to this agreement shall lie in Pierce, Washington.

10. FUTURE MODIFICATION OR EXPANSION

Any future modification or expansion of the Member owned Generating Facility will require an engineering review and approval by LLP. LLP reserves the right to require the Member, at Member's expense, to provide modifications or additions to existing electrical devices including, but not limited to protection device and meters, in the event of changes to government or industry regulation and/or standards.

11. AMENDMENTS, MODIFICATIONS OR WAIVER

Any amendments or modifications to this Agreement shall be in writing and agreed to by both Parties. The failure of any Party at any time or times to require performance of any provision hereof shall in no manner affect the right later to enforce the same. No waiver by any Party of the breach of any term or covenant contained in this Agreement, whether by conduct or otherwise, shall be deemed to be construed as a further or continuing waiver of any such breach or waiver of the breach of any other term or covenant unless such waiver is in writing.

12. ASSIGNMENT

The Member shall not assign its rights under this Agreement without the express written consent of LLP. LLP may impose reasonable conditions on any such assignment to ensure that all of Member's obligations under this Agreement are met and that none of Member's obligations under this Agreement are transferred to LLP as a result of default, bankruptcy, or any other cause.

13. APPENDICES

The Agreement includes the following appendices attached and incorporated by reference:

Appendix A: Application for Interconnecting a Generating Facility No Larger than 100kW

Appendix B: Generating Facility Certificate of Completion

Appendix C: Member Checklist for LLP Interconnection

14. NOTICES

All written notices shall be directed as follows:

Lakeview Light & Power, 11509 Bridgeport Way SW, Lakewood, WA 98499

Member Name

Address

City, State & Zip

Phone

Member notifications to LLP, pursuant to this Section 15, shall refer to the Service Address set forth in Appendix A, Application for Net Metered Electrical Generation.

15. TERM OF AGREEMENT

This Agreement shall be in effect when signed by the Member and LLP and shall remain in effect thereafter month to month unless terminated by either Party on thirty (30) days' prior written notice in accordance with Section 13.

16. SIGNATURES

IN WITNESS WHEREOF, the Parties hereto have caused two originals of this Agreement to be executed by their duly authorized representatives.

This Agreement is effective as of the last date set forth below.
