

**Lakeview
Light &
Power**

Looking to the future since 1922

Transformers

When filling out the Service Request Form, make sure the information is accurate. If after six months from the date of energization, the estimated connected load as reflected on the Service Request Form, and realistically diversified by Lakeview Light & Power, is not within 20% of the actual load, the customer shall be responsible for the cost of changing out the transformer and other related equipment.

Current Transformers

When a single service is metered through Current Transformer (CT) and the minimum demand as determined by Lakeview Light & Power during a six-month period is less than 20% of the CT name plate rating, the customer may be required, at his/her own expense, to have Lakeview Light & Power replace them with the proper size.
